Profile

Write what you want from the conference. Intent is the strongest ranking signal; keywords, avoid terms, and optional CV text give the sliders in Recommendations more useful material to work with.

Intent

I want to deepen my knowledge of AI-based hiring assessments and learn how to evaluate their validity, fairness, adverse impact, and practical implementation.

Keywords

algorithmic hiring, adverse impact, validation studies, AI assessm

Avoid

academic career advice

CV file

Recommendations

Top sessions ranked by profile fit. Conflicts are marked by session ID and rank. Use Top N to choose how many sessions feed the table, agenda, and map; use the weight sliders to adjust how strongly intent, keywords, CV text, and avoid terms influence the ranking.

Top N **Intent** **Keywords** **CV** **Avoid**

20

Ranked 478 sessions. Showing top 20.

Rank	Score	Session ID	Title	Type	Day	Start	Room	Conflicts with
